Zyuganovka winter wheat variety is in the Book of Records of Russia

On August 4, 2025, a new record for the maximum productivity of winter wheat plants was set in Russia. The new variety of winter wheat Zyuganovka, bred by Schelkovo Agrohim and grown using the company's technologies at the experimental plots of LLC NPO Betagran Seeds in Oryol region, yielded **184.95 centners per hectare**, setting a new record and being entered into the Book of Records of Russia.

General information

Crop: winter wheat

Variety: Lutescence

Value: Improved grain quality

Maturity group: mid-season-ripening

Vegetation period: 310 to 313 days

Yield: 184.95 dt/ha (Orel Region)

Hybrid morphological properties:

- bush type: upright
- spike: prismatic white

Resistance to disease

- winter hardness:
- Drought resistance:
- disease resistance:
- lodging resistance:

Value

- increased yielding capacity: more than 150 dt/ha
