

Ultramag Combi for oilseeds

Liquid complex microfertilizer concentrate intended for all oilseed crops

Advantages:

- It is developed considering oilseed plant demands for nutrients.
- It improves yield and plant immunity to disease, and enhances seed quality.
- The preparation maintains winter rape during winter.
- It contains a balanced set of microelements to fully meet oilseed crop demands for nutrients.
- Microelements are contained in a chelate form easily digestible by the plant, which guarantees their complete, effective and efficient digestion by plant surfaces.
