Lion Seeds hybrids

Diploid sterile-base normal-sugary type (NZ) hybrid.

General information

Hybrid type: NZ-type

Producing regions: Central Black Earth (5) and North Caucasus (6)

Yield indicators:

- potential sugar content: 17.4%
- potential yield: 59,1 t/ha
- sugar yield: 9,9 t/ha

Hybrid morphological properties:

- root shape: conical
- Root crop embedding into soil: 80–90%

Hybrid disease resistance:

Beet necrotic yellow vein virus
Cercosporosis
Ramularia leaf spot
Afanomycete rot
Powdery mildew
Root borer

Drought resistance
Premature seeding resistance

Harvesting period: late
