

# Molniya

SoyuzSemSvekla new-generation selection hybrid

It has healthy leaves, stable yield, high juice purity, stability to acid soils, is easy to store. The technological root shape enables easy extraction of the root from the soil and achievement of low soil pollution of the root.

## General information

Hybrid type: N-type

Producing regions: Volga and Vyatka (4), North Caucasus (6)

Vegetation period: 150 days

Harvesting period: medium

Yield indicators:

- potential sugar content: 18,3%
- potential yield: 83 t/ha

Hybrid morphological properties:

- root shape: wide conical
- leaf rosette shape: spreading
- depth of embedding into the soil: 3/4

Hybrid disease resistance:

	<b>Resistant</b>	<b>Medium resistance</b>
Cercosporosis		
Ramularia leaf spot		
Powdery mildew		
Root borer		
<b>to weather factors</b>		<b>High</b>
Drought resistance
